Luka Markovic

Frontend developer

luka.markovic@example.com

PROFILE

I build accessible web interfaces with React and TypeScript. I enjoy turning complex requirements into clear screens, collaborating with designers, and improving mobile usability. My recent projects focus on education tools and environmental data.

SKILLS

React, TypeScript, JavaScript, HTML, CSS, Git, Firebase, Figma, accessibility, responsive web design.

SELECTED PROJECTS

Study Planner | Personal project | 2026

Created a React and TypeScript app for tracking study sessions and deadlines. Used Firebase authentication and Firestore to save progress. Built keyboard-accessible forms and responsive layouts.

Air Quality Dashboard | Team project | 2025

Built the frontend for a dashboard showing public air quality readings. Worked with two teammates to integrate a REST API, add charts, and improve loading and error states.

EDUCATION

Open Learning Academy
Certificate in web development | 2025
Coursework: JavaScript, React, web accessibility, and interface design.

INTERESTS

Education technology, environmental data, accessible software, and open-source projects.
