Rafael Domínguez

Financial Analyst — Investment Research

Madrid, Spain | rafael.dominguez@example.com | linkedin.example.com/in/rafael-dominguez

PROFESSIONAL SUMMARY

Investment research analyst with 13 years of experience in equity research and infrastructure finance, specializing in European utilities, renewable energy, and telecom companies. Builds detailed company models, including discounted cash flow, sum-of-the-parts, and regulated asset base valuations, and writes initiation reports and earnings notes for institutional clients. Combines fundamental analysis with primary research, such as expert calls, site visits, and channel checks, and with Python-based analysis of filings and earnings call transcripts. Presents investment theses clearly to portfolio managers and explains the key assumptions and risks behind each view. Interested in energy transition economics, ESG analysis grounded in financial impact, and transparent research methods.

ANALYTICAL AND TECHNICAL SKILLS

Investment research: Equity research, industry analysis, initiation reports, earnings previews and reviews, investment theses, expert-network and channel-check research, ESG analysis.

Valuation: Discounted cash flow (DCF), sum-of-the-parts, regulated asset base (RAB) valuation, comparable-company and precedent transaction analysis, dividend discount models.

Financial modeling: Integrated three-statement company models, project finance models, debt sculpting, scenario and sensitivity analysis.

Accounting and financial statements: IFRS financial statement analysis, quality-of-earnings review, cash flow and leverage analysis.

Programming and data analytics: Advanced: Excel and VBA. Working knowledge: Python (pandas, NumPy, basic text analysis), SQL.

Data platforms and tools: Bloomberg Terminal, FactSet, Refinitiv Eikon, company filings databases, PowerPoint.

Industry coverage: Utilities, renewable energy and battery storage, telecom, transport infrastructure.

Communication: Written research reports, client meetings, and investor presentations in English and Spanish.

PROFESSIONAL EXPERIENCE

Castellana Capital Research (independent equity research) — Madrid, Spain

Senior Equity Research Analyst — *Jan 2020 – Present*

- Cover 14 listed European utilities and renewable energy companies; published six initiation reports and more than 150 earnings and company notes for institutional clients.
- Build and maintain DCF, sum-of-the-parts, and regulated asset base models with explicit assumptions on power prices, capacity additions, interest rates, and allowed regulatory returns.
- Conduct primary research through expert calls, project site visits, and conversations with equipment suppliers to test management guidance on renewable capacity build-out.
- Present investment theses to portfolio managers and analysts at client firms, focusing on the drivers that would change each view.
- Developed an ESG assessment framework that links emissions intensity, carbon cost exposure, and capital expenditure plans to valuation scenarios.

Puerta del Sol Securities (brokerage) — Madrid, Spain

Equity Research Associate — *Jul 2016 – Dec 2019*

- Supported the senior telecom analyst covering nine European operators by maintaining financial models, preparing earnings previews, and drafting sections of sector reports.
- Built a comparable-company database from company filings in Excel and Python, cutting the time to update sector valuation tables from a day to about an hour.
- Analyzed spectrum auction outcomes and fiber roll-out economics for a sector report on network investment.

Synthetic profile created for talent-matching software testing. All people, employers, institutions, events, and credentials are fictional.

Grupo Meridiano Infraestructuras (infrastructure concessions) Barcelona, Spain
Financial Analyst, Infrastructure *Sep 2013 – Jun 2016*

- Built and maintained project finance models for three toll-road concessions, including traffic scenarios, debt sculpting, and debt service coverage ratio analysis.
- Prepared quarterly lender reporting packages and covenant compliance calculations.
- Supported bid teams with sensitivity analysis on construction cost and traffic risk.

SELECTED PROJECTS

Battery storage revenue stack model
Tools and methods: Excel, Python, public power market price data, scenario analysis

- **Problem:** Investors lacked a consistent way to value battery storage revenue from arbitrage, capacity, and balancing services.
- **Contribution:** Built a model that combines historical price data with scenarios for market saturation and battery degradation.
- **Result:** Used in a sector report on storage economics; all assumptions were published so clients could reproduce the analysis.

Earnings call transcript analysis
Tools and methods: Python (pandas, keyword and sentiment scoring), SQL

- **Problem:** Changes in management tone and guidance across 14 covered companies were hard to track consistently.
- **Contribution:** Built a tool that flags guidance changes and recurring risk themes across quarterly transcripts.
- **Result:** Saves about six hours of reading per earnings season and highlights topics for follow-up questions with management.

Regulated returns sensitivity tool
Tools and methods: Excel, VBA, regulated asset base modeling

- **Problem:** Regulatory rate reviews affect several covered companies at the same time.
- **Contribution:** Built a shared tool that links allowed returns to each company's valuation.
- **Result:** Used to publish same-day reaction notes after regulatory announcements.

EDUCATION

Instituto de Estudios Financieros de Madrid Madrid, Spain
M.Sc. Finance *2012 – 2013*

- Specialization in corporate valuation; capstone project valuing a Spanish wind energy developer.

Universidad Costa Brava de Barcelona Barcelona, Spain
B.A. Economics *2008 – 2012*

- Coursework: econometrics, corporate finance, industrial organization, accounting.

HACKATHONS, CONFERENCES, AND PROFESSIONAL ACTIVITIES

- **European Energy Transition Investor Day, Madrid (2024)** — Speaker on the valuation of grid and battery storage investments.
- **Iberian Valuation Case Competition (2013)** — Member of a three-person team that valued a listed infrastructure company and presented to a panel of practitioners.
- **Internal research methods note (2022)** — Back-tested a valuation-based screening rule on historical data for internal discussion; the results were a simulation only and are not a record of live investment performance.

CERTIFICATIONS AND ADDITIONAL QUALIFICATIONS

Professional development (illustrative): Advanced Valuation Program, Northbridge Finance Institute (2018); ESG Integration in Equity Research, Northbridge Finance Institute (2021).

Languages: Spanish (native), English (fluent), Portuguese (professional working proficiency).

Synthetic profile created for talent-matching software testing. All people, employers, institutions, events, and credentials are fictional.
