Grace Park

Financial Analyst — Financial Data Analytics

Sydney, Australia | grace.park@example.com | linkedin.example.com/in/grace-park | github.example.com/gracepark-data

PROFESSIONAL SUMMARY

Financial data analyst with 11 years of experience combining finance knowledge with data engineering and business intelligence in insurance, telecommunications, and retail. Builds finance data marts, reconciliations, and dashboards with SQL, Python, dbt, Snowflake, Tableau, and Power BI so that finance teams can trust and explain their numbers. Built a single finance data model behind 40 monthly reports and automated subledger-to-general-ledger reconciliation, shortening month-end close by two days. Found AUD 3.1 million in annual billing leakage through revenue assurance analytics. Works closely with financial controllers, FP&A, and actuaries, and is interested in data quality, data lineage, and practical automation in finance.

ANALYTICAL AND TECHNICAL SKILLS

Programming and data analytics: Advanced: SQL, Python (pandas, NumPy, scikit-learn). Working knowledge: R, VBA, DAX.

Data platforms: Snowflake, dbt, Microsoft SQL Server, PostgreSQL, Fivetran. Working knowledge: Azure Data Factory.

Business intelligence and reporting: Tableau, Power BI, management reporting packs, KPI design, self-service reporting.

Accounting and financial statements: General ledger and subledger structures, chart of accounts mapping, month-end close, reconciliations, revenue recognition basics.

Forecasting and budgeting: Cash flow forecasting with time-series models (Prophet, ARIMA), driver-based forecast support for FP&A.

Data quality and governance: Data quality rules, data dictionaries, data lineage documentation, access controls, audit trails.

Analytical methods: Anomaly detection, cohort analysis, revenue assurance, variance analysis, A/B test analysis.

Finance systems: SAP S/4HANA finance data extraction, Oracle Fusion reporting. Working knowledge: Guidewire policy data.

Industry experience: General insurance, telecommunications, retail.

PROFESSIONAL EXPERIENCE

Coral Coast Insurance Group (general insurance) Sydney, Australia

Senior Financial Data Analyst *Feb 2021 – Present*

- Built a finance data mart in Snowflake with dbt that combines SAP general ledger, policy administration, and claims data; it is now the single source for 40 monthly finance and executive reports.
- Automated reconciliation between premium and claims subledgers and the general ledger in Python and SQL, shortening month-end close by two days and documenting every break for the financial controller.
- Designed Tableau dashboards for the CFO office covering written premium, claims ratio, and expense ratio by product and channel, replacing 15 manually prepared spreadsheets.
- Implemented 180 data quality tests and a finance data dictionary with lineage from source system to report, reducing post-publication report corrections from about six per month to one.
- Partner with actuaries and FP&A analysts on data for reserving reviews and forecasts.

Wattle Telecom (telecommunications) Melbourne, Australia

Financial Analyst, Reporting and Analytics *Jul 2017 – Jan 2021*

- Built revenue assurance analytics comparing network usage, rating, and billing records, identifying AUD 3.1 million in annual billing leakage that was recovered through system fixes.
- Developed the monthly management reporting pack in Power BI on SQL Server data models, reducing preparation from five days to two.
- Analysed customer cohort revenue and churn for the pricing team, supporting a plan restructure.
- Supported FP&A with subscriber and revenue forecasts based on historical trends and promotional calendars.

Synthetic profile created for talent-matching software testing. All people, employers, institutions, events, and credentials are fictional.

Southerly Retail Co. (retail) Brisbane, Australia
Business Analyst, Finance *Feb 2015 – Jun 2017*

- Rebuilt store profit and loss reporting for 85 stores by replacing linked Excel workbooks and VBA macros with SQL queries.
- Analysed promotional sales performance with the merchandising team.
- Maintained finance master data, including cost centres and store hierarchies.

SELECTED PROJECTS

Journal entry anomaly detection
Tools and methods: Python, scikit-learn (isolation forest), Snowflake

- **Problem:** Manual journal review covered only a small sample of entries.
- **Contribution:** Engineered features for timing, user, amount, and account pairs and used an isolation forest to rank unusual entries for review.
- **Result:** Internal audit now reviews the top 2% of entries each month; the model highlighted two misposted accruals in its first quarter.

Cash flow forecasting model
Tools and methods: Python, Prophet, Snowflake, Tableau

- **Problem:** The treasury team's weekly forecast relied on manual estimates.
- **Contribution:** Built a time-series forecast of premium receipts and claims payments with business calendar effects.
- **Result:** Four-week forecast error fell from 11% to 6%.

Finance data lineage documentation
Tools and methods: dbt docs, Snowflake, Confluence

- **Problem:** Report owners could not explain where figures came from during audits.
- **Contribution:** Documented lineage for 40 reports and trained report owners to maintain it.
- **Result:** Audit data requests are now answered within a day instead of a week.

EDUCATION

University of Port Jackson Sydney, Australia
Bachelor of Commerce (Finance) and Bachelor of Information Technology *2010 – 2014*

- Distinction average; capstone project on automating financial statement analysis with SQL.
- Coursework: financial accounting, corporate finance, database systems, statistics.

HACKATHONS, CONFERENCES, AND PROFESSIONAL ACTIVITIES

- **Finance Analytics Summit Sydney (2025)** — Speaker on automating reconciliations without losing financial control.
- **Open Budget Hackathon, Sydney (2019)** — Built a public dashboard explaining local council spending with open data.
- **Women in Data Sydney (2020 – Present)** — Volunteer workshop leader for SQL and Tableau sessions.

CERTIFICATIONS AND ADDITIONAL QUALIFICATIONS

Professional development (illustrative): Analytics Engineering Program, Northgate Data School (2021); Data Visualisation for Finance Course, Northbridge Finance Institute (2019).

Languages: English (native), Korean (professional working proficiency).

Synthetic profile created for talent-matching software testing. All people, employers, institutions, events, and credentials are fictional.
