Aleksandar Stefanović
Computer Engineering Student | Data & Backend Systems

Belgrade, Serbia
Phone number: +381 63 436 297
Email: aleksandar.stefanovic2203@gmail.com
LinkedIn | GitHub

PROFILE:
Final-year computer engineering student with a systems, database, and machine learning background. Built query cost estimation logic over schema statistics, stored-procedure-heavy SQL Server systems with Java clients, and ML pipelines with scikit-learn. Comfortable in Python and SQL, interested in agentic LLM systems and their evaluation.

EDUCATION:
University of Belgrade, School of Electrical Engineering | *Expected Graduation: 2027*
Bachelor of Science in Electrical Engineering and Computing
Module: Computer Engineering and Information Theory

First Belgrade Gymnasium - Program for Students with Special Abilities in CS/IT | *Graduated: 2022*

PROJECTS:
Exam Score Predictor | *Python* | *2026* | GitHub
- Built a full ML pipeline (cleaning, feature engineering, model training/evaluation) to predict exam scores
- Compared KNN and linear regression using MAE, MSE and RMSE; linear regression outperformed KNN across all metrics, cutting RMSE by ~30% (2.28 vs. 3.24)

SQL Query Cost Estimator | *Python* | *2026* | GitHub
- Implemented a system for parsing and evaluating the cheapest evaluation plan for a given query
- Supports indexes (clustered B+ tree, non-clustered B+ tree, hash) and various join algorithms (nested loop, block nested loop, index nested loop, external sort-merge, hash join)

Movie Platform | *T-SQL, JDBC* | *2026* | GitHub
- Built a SQL Server database for a movie platform connected to a Java interface via JDBC
- Implemented various functionalities using SQL triggers, stored procedures and functions

TECHNICAL SKILLS:
Programming languages: Python, SQL, Java, C, C++, C#, JavaScript / TypeScript
Machine learning: scikit-learn, pandas/numpy, matplotlib
Data & databases: SQL Server / T-SQL, JDBC, query optimization and cost estimation
Frameworks and tools: Spring Boot, Angular, Git, Linux/Bash

EXPERIENCE:
Laboratory Demonstrator — University of Belgrade, School of Electrical Engineering
Nov 2025 – Feb 2026
- Mentored students through hands-on technical exercises, translating problems into step-by-step debugging
- Improved communication and teamwork through direct student interaction

LANGUAGES:
English: Advanced (Fluent)
Serbian: Native
