# Luka Prlinčević

Novi Sad, Serbia | prlincevic04@gmail.com | +381 64 086 27 75 | github.com/Prle04

## Summary

Software Engineering student with hands-on experience in backend development, cloud infrastructure and application security. Built projects involving PKI systems, cloud data pipelines, graph visualization and storage engines, with a strong foundation in Java, Spring Boot, Go and AWS. Seeking a Software Engineering, Backend or Cloud/DevOps internship.

## Education

### FACULTY OF TECHNICAL SCIENCES, UNIVERSITY OF NOVI SAD

- BSc in Software Engineering and Information Technologies | 2023 - present

## Professional Development

### CLOUD & DEVOPS TRAINING | EPAM | SEPTEMBER 2026 - ONGOING

- Training in Linux, Bash, Python, Docker and Microsoft Azure, focused on practical Cloud and DevOps workflows, with additional modules to follow.

## Projects

### PUBLIC KEY INFRASTRUCTURE & CERTIFICATE MANAGEMENT PLATFORM | JAVA, SPRING BOOT, ANGULAR

- Built a PKI platform supporting X.509 certificate issuance, chain validation, revocation, secure private-key storage, role-based access and HTTPS communication.

### AWS CLOUD DATA COLLECTION & DATA LAKE | AWS, CDK / TERRAFORM, PYTHON

- Built an automated cloud data pipeline for collecting and storing Hacker News data in a structured S3 data lake, with scheduled execution, monitoring and infrastructure as code.

### GRAPH VISUALIZATION PLATFORM | PYTHON, JAVASCRIPT, D3.JS

- Developed a pluggable platform for visualizing graph structures from multiple data sources, designed for flexible integration and clear interactive exploration of graph data.

### RIDE-HAILING FULL-STACK WEB APPLICATION | JAVA, SPRING BOOT, ANGULAR

- Developed a ride-hailing system covering ride creation and management, user and driver workflows, route handling, authentication and backend–frontend integration.

### WRITE-HEAVY STORAGE ENGINE | GO

- Designed a custom write-heavy storage engine with in-memory buffering, persistent storage and efficient organization of data on disk.

## Technical Skills

**Languages:** Java, C++, Python, Go, SQL, TypeScript
**Backend & APIs:** Spring Boot, REST APIs, JWT, microservices
**Frontend & Mobile:** Angular, Android (Native)
**Databases:** PostgreSQL, MySQL
**Cloud & DevOps:** AWS (S3, Lambda, EventBridge, CloudWatch, SNS), Terraform, AWS CDK, Docker, Linux, Bash, Git
**Security & Core CS:** PKI, X.509 Certificates, HTTPS, Algorithms, Data Structures, Software Design Patterns

## Community & Leadership

### RED CROSS | VOLUNTEER | 2018 - PRESENT

- Provide first-aid support and participate in community outreach; earned certifications in first aid and anti-trafficking education.

### EESTEC CHALLENGE HACKATHON | ASSISTANT COORDINATOR, ACADEMIC PROGRAM

- Participated in creating the hackathon task and supported academic-program organization and coordination for participants and mentors.

## Competitions & Achievements

3rd place, DigiHack Hackathon — Belgrade, September 2024
Participant, LUMEN Data Science Competition — Zagreb, April 2025
Finalist, Google GDG On Campus Hackathon
