

Veljko Jovanovic

veljaapolon@gmail.com +381 637203454 Kragujevac, Serbia

Summary

Ambitious and analytically-driven Computer Science student with a strong foundation in data structures, algorithms, and predictive modeling. Possesses practical industry experience bridging the gap between software development and data pipelines. Proven ability to handle complex data architectures, apply machine learning techniques, and solve real-world analytical challenges, as demonstrated through enterprise internships and competitive hackathons.

Education

University of Kragujevac — Bachelor's Degree • 2027

Computer Science — Kragujevac, Serbia • 2023-Present

- *Status:* Currently in 4rd year of undergraduate studies.
- *Core Focus:* Advanced Mathematics, Data Analysis, Database Management Systems, Software Engineering.

Experience

Power Lever — Kragujevac, Serbia

Data Entry/Junior JavaScript developer — March 2025.-Present

- Leveraged JavaScript to automate data workflows and optimize internal data manipulation processes.
- Maintained, reviewed, and debugged existing software solutions to ensure high data integrity and application reliability.
- Analyzed structured and unstructured data, ensuring seamless transition and integration into database systems.

Htec Group — Kragujevac, Serbia

Data Scientist/ML engineer intern — March 2026. - April 2026.

- Co-developed Brainbench, an AI-powered smart assistant designed to provide basketball coaches with tactical analysis and player performance metrics.
- Implemented machine learning models and built data processing pipelines to extract actionable sports insights from raw statistics.
- Collaborated with a senior engineering team in an agile environment to design, test, and validate predictive data models.

PROJECTS & HACKATHONS

Data Science Hackathon, Belgrade Participant | Organized by Ominimo Insurance — March 2026.

- Participated in an intensive, time-constrained data hackathon to build a predictive insurance model.
- Engineered features, cleaned complex data arrays, and utilized statistical modeling to solve concrete financial risk problems.
